cabinets of experimental philosophy in eighteenth century europe is an ambitious  
contribution to the growing interest in how science came to engage the attention of a public  
outside the academic and professional spheres and how collections of instruments played a  
formative role in this development collections of physical instruments for research and  
demonstration appeared throughout europe in the eighteenth century and the coverage of  
the book is correspondingly broad while collections in different cultural and geographical  
locations had much in common there were significant local modifications the essays in this  
book illustrate how science sometimes thought to be monolithic and universal can maintain  
core intellectual characteristics and practical techniques while adapting to particular sites  
and circumstances contributors include jim bennett sofia talas huib j Zuidervaat hans
